### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Appellant's claimed invention includes a method of reducing viral and bacterial population by contacting a surface for 30 seconds to achieve a log reduction of 3 with an aromatic carboxylic acid as the sole antimicrobial component, dipropylene glycol, water and pH of 2-5.5. The closest prior art of record, Beerse et al, teaches the inclusion of additional antimicrobials such as metal salt and benzoic acid, but does not teach only an aromatic carboxylic acid as claimed. Further, appellant has demonstrated by examples 1,3,4,7 and 9, that both dipropylene glycol and an aromatic carboxylic as the sole antimicrobial exhibit the highest efficacy. Moreover, the Declaration submitted on July 25, 2008 declares that the compositions of Beerse et al are not efficacious for *S. aureus* or *E. coli* at 30 seconds with a log reduction of 3. Accordingly, the claims are allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
